

# Meet Marie Antwinette.

## Human Resources Manager

**You may have expected to see someone else...**

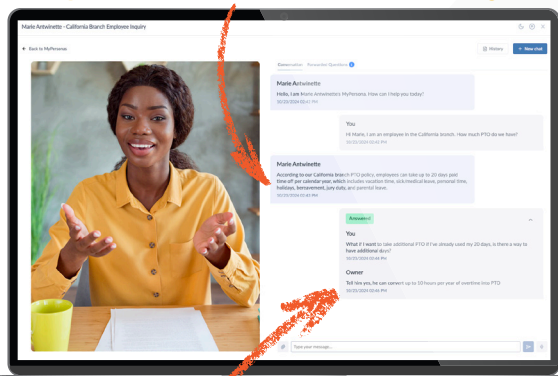

but as her company's HR manager, she wants to offer her team **more than cake**. To give her the bandwidth she needed, they created **digital clones** of her using MyPersonas™.

**Unlike traditional chat bots or knowledge bases,**

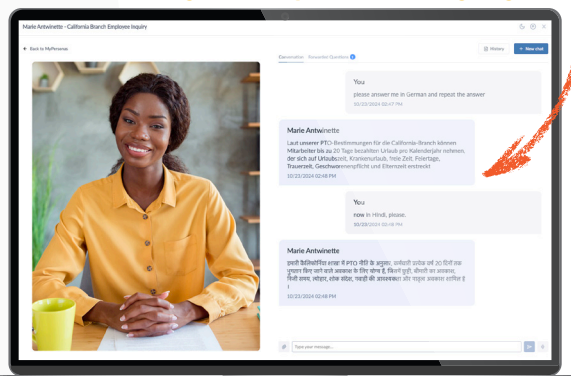

MyPersonas lets you create **AI video clones** of your executives, department heads, or **anyone who's frequently pulled away from critical tasks answering recurring questions**. These clones offer a human connection while maintaining the person's knowledge, communication style, and expertise—**accessible 24/7** and across **multiple languages**. When the clone can't answer a question, it connects with its **human counterpart** via mobile app, email, or platforms like Slack and Teams. Once the question is answered, it updates the chat, emails the person who asked, and our patent-pending technology **enhances its knowledge** for future use.

The future of communications isn't about choosing between human touch and AI — it's about creating a powerful synergy, where **AI amplifies human capability rather than replaces it**.

**MyPersona answers from its knowledge.**

**Your HR Manager now speaks 160 languages.**

**MyPersona's human owner answers a question that was not found in their knowledge.**

**Get Started Today with your Free 14 Day Trial**  
**No Credit Card Required**

**MyPersonas™**
